Autani Debuts Ground-Breaking Fixture Conversion Kit at Lightfair 2017

Columbia, MD – Autani, LLC, a proven leader in building controls and IoT, will debut their e>kit fixture conversion kit at Lightfair International 2017, world's largest annual architectural and commercial lighting trade show and conference. Autani's e>kit converts existing prismatic fluorescent fixtures to LED fixtures with a simple one-piece kit. Flexible sizing adjustment allows e>kit to fit virtually any fixture. Designed to replace the existing fluorescent lighting source, Autani's conversion kit provides optimal LED lighting for virtually any space and creates a smaller energy footprint.

“Autani's e>kit provides a fast, safe and cost effective way to convert traditional lighting to LED lighting,” said Jim Seabury, CEO of Autani's parent company Enterprise Solutions. “We're excited to debut such an innovative solution at Lightfair 2017.”

About Autani, LLC

Autani, LLC (www.autani.com) is a Building Automation Provider with a proven track record of reducing energy consumption. At the core of our product offering is EnergyCenter, a building management platform that connects Lighting, Metering, HVAC, Refrigeration and Sensors to control, monitor and verify energy consumption through a single, powerful system with either wireless or wired connectivity. Autani's building IoT platform, Enterprise, complements EnergyCenter to provide data warehousing and visualization capabilities for connected sensors and control points. For existing and new properties of nearly any size, Autani's easy-to-understand energy dashboard and EnergyCenter software validate how much, where and when energy is being saved at all times. A pioneer in the Internet of Things movement, Autani has been developing and delivering IoT solutions since 2007. Autani was founded in 2006 and is based in Columbia, MD. All of Autani's energy management solutions are designed and manufactured in the USA.
