Autani Facility Management

The Easy Way to Manage Your Budget and Create an Inviting Environment

Whether your business owns its facilities or leases via a triple net lease, there are financial benefits to upgrading and controlling the parking lot lighting system. A significant reduction in energy costs and maintenance costs can be achieved, while improving the overall aesthetics and image of your business and making your employees or customers feel safe.

Autani's Energy Manger with EnergyCenter software provides a simple to use system that helps ensure that your parking lot lighting with associated energy saving control strategies are functioning properly while minimizing operational risk.

Expenses and risk can be managed and reduced by:

- Maximizing natural daylighting with an astronomical timeclock
- Extending the life of the outdoor lighting system and reduce maintenance costs
- Reducing light output and energy costs with master timeclock scheduling
- Creating wireless alerts if light fixtures are not functioning properly to reduce risks
- Tuning the parking lot lighting to be more welcoming and not appear 'too bright'

You can't manage what you can't measure.

The Autani EnergyCenter can help you get control of your parking lot to match the outdoor fixture light output with outdoor conditions and events.

ADDITIONAL FEATURES & BENEFITS

- The Autani Manager keeps the facility running efficiently, bringing together all of the wireless control devices under management.**
- An Autani Wireless Meter is a utility grade meter that can help you isolate your parking lot electrical consumption by circuit.**
- The Autani Wireless Outdoor Lighting Control allows programmable scheduling that is synchronized with the rest of the building's operation.**

Agnostic and Compatible with multiple manufacturers with these technologies:

DESIGNED & MADE IN USA

WIRELESS OUTDOOR LIGHTING CONTROL

The easy to install and easy to manage system can be easily configured to your dealership facility needs. If your facility expands then the system can easily be adapted to accommodate more lighting and greater range. Autani can help you control and manage the first and last impressions of your facility to the customers and staff.

The Wireless Outdoor Lighting Control installs where the photocell would be used converting the light into a wireless smart device compatible with Autani's EnergyCenter.

The Autani EnergyCenter can help you get control of your parking lot to match the outdoor fixture light output with outdoor conditions and events. Autani can help you:

- ✓ Maximize natural daylighting with an astronomical timeclock
- ✓ Reduce light output and energy costs with master timeclock scheduling
- ✓ Tune the parking lot lighting to be more welcoming and not appear "too bright"
- ✓ Extend the life of the outdoor lighting system and reduce maintenance costs
- ✓ Create wireless alerts if light fixtures are not functioning properly to reduce risks
