## Autani Facility Management

#### The Easy Way to Manage Your Budget and Create an Inviting Environment

Whether your business owns its facilities or leases via a triple net lease, there are financial benefits to upgrading and controlling the parking lot lighting system. A significant reduction in energy costs and maintenance costs can be achieved, while improving the overall aesthetics and image of your business as well as making your employees and customers feel safe.

Autani's Energy Manger with EnergyCenter software provides a simple to use system that helps ensure your parking lot lighting is functioning with optimal energy saving control strategies while minimizing operational risk.

Expenses and risk can be managed and reduced by:

Maximizing natural daylighting with an astronomical timeclock

Reducing light output and energy costs with master timeclock scheduling

Tuning the parking lot lighting to be more welcoming and not appear too bright

(NP)	Ext
$\langle X \rangle$	sys

ending the life of the outdoor lighting stem and reducing maintenance costs

Creating wireless alerts to notify you if light fixtures are not functioning properly

You can't manage what you can't measure.

EnergyCenter helps you maintain ideal outd lighting levels based on conditions and events.

#### **ADDITIONAL FEATURES & BENEFITS**

- 1 The Autani Manager keeps the facility running efficiently, bringing together all of the wireless control devices under management.
- 2 The Autani Wireless Outdoor Lighting Control supports advanced programmable scheduling that is synchronized with the rest of your building lighting.
- 3 An optional Autani Wireless Meter can help you analyze energy use within your facility on each electrical circuit.and savings within your outdoor parking facility

## WIRELESS OUTDOOR LIGHTING CONTROL

Autani lighting controls are easy to install and manage, and the controls can be optimized to your retail facility needs. As you expand your business operations, the system can be adapted to accomodate additional indoor and outdoor lighting, and cutting edge sensors can be added to monitor the operating health of your facility. Autani can help you control and manage the first and last impressions of your facility to the customers and staff.

The Wireless Outdoor Lighting Control installs where the photocell would be used converting the light into a wireless smart device compatible with Autani's EnergyCenter. EnergyCenter helps you maintain ideal outdoor lighting levels using a variety of strategies:

- Maximize natural daylighting and reduce light output with an astronomical timeclock.
- Tune the parking lot lighting to be more welcoming and not appear too bright
- Extend the life of the outdoor lighting system and reduce maintenance costs
- Create wireless alerts if light fixtures are not functioning properly to reduce risks
- Guide customers to the building by providing a natural light gradient that brightens as you approach the facility
- Save energy and reduce light pollution by safe but reduced light levels during after-hours periods
